as we reflect on the key events of Lent and Holy Week.

Sign up on the list  
at the back of  
church.  
For more details speak  
To Mark, Sarah-Jane  
or Charlotte

## Thought for Month

On 6th January the church celebrates The Feast of the Epiphany - actually in St Saviour's we'll do this on 4th January as it's the nearest Sunday.

Those in the know say it took the Wise Men around a year to journey from their homeland to Bethlehem to find Jesus. That took determination, that took stickability. It could have been easy for them to give in, "O let's just not bother", "let's return home".

Their journey took them across great distance, through hostile environments. It took them to Herod's palace where they could easily have given up finding no baby there. Yet they kept at it, until they reached the smelly stable where

Jesus the baby King was.

Finally they had fulfilled their journey, they had reached their goal.

Determination.

Stickability.

Qualities we need in life  
and in faith.

**What is a carbon footprint?** The calculation of the carbon emissions you produce, as a church or individual, is known as your carbon 'footprint'. A carbon footprint not only takes into consideration the energy used to heat and light your home, but includes travel and where we invest our money, whether we have a few pounds or many. It is helpful to understand your carbon footprint in order to make reductions in your carbon emissions. There are a number of free carbon footprint calculators available for individuals and households such as the [WWW Carbon Footprint Calculator](#) and [Climate Stewards 360°](#) carbon tool. This will form an important baseline measure, the first time you complete it. By calculating your carbon footprint each year you can make comparisons and see progress on your carbon reduction. *Why not make this your New Year Resolution?*
